

# Continuing care in the community

Once your medical condition is stable, plans will be made for you to return home as soon as possible, with support from community teams when required.

If you require further care and assessment before you return home you will be transferred to a more appropriate community facility.

If you have any questions then please ask the nurse in charge.

We wish you a speedy recovery.

## Our acute hospital isn't the best place for you to recover

If you are medically stable, but not well enough to go home, you will be transferred to either a:

- community hospital bed
- recovery and rehabilitation centre
- short-term assessment bed in a care home
