3) How many people have been admitted to A&E due to attempted suicide in the last five years, alternatively if this isn't

available the last 3 years is fine.

This data is not available as unable to distinguish attempted suicide from self-harm categories

4) How many of these people who attempted suicide were treated more than once by the hospital in this time?

This data is not available as unable to distinguish attempted suicide from self-harm categories

5) How many recorded deaths have there been in the time frame where the cause of death was suicide.

The coronor and/or Council should hold this information

Thank you
