I'm looking to find out some information regarding the number of members of staff working on maternity wards at both the Alexandra and the Worcestershire Royal who have handed in a notice of resignation since the start of 2013 up to present day /as close to present day as possible.

If you could separate the results into which hospital they worked for and break it down into months of the year for 2013,2014,2015 and 2016 - that would be really helpful.

For any members of staff who handed in their notice between November 2015 and today - could you also tell me if they had originally transferred from the Alex.

| Headcount of Maternity Wards Leavers exc. zero hours | Month of Departure Year of | | | | | | | | | | | | | | | | |
|------------------------------------------------------|----------------------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|-----|----------|--|--|--|

| Grand Total | | 8 | 2 | 3 | 2 | 2 | 6 | 2 | 10 | 8 | 4 | 6 | 8 | |

^{* -} this figure includes one planned retirement.

As the departments haven't been amalgamated, leavers since November 2015 still appear under the correct site bases.

For the sake of completeness, the figures below show the total number of staff in post during those months. It would be unrealistic to expect zero resignations on a month by month basis. We expect staff to move around for career opportunities.

Please note that the birth rate has fallen since 2013 hence less staff are in post.

| Maternity Ward Staff In Post Headcount exc. Zero Hours | | Calendar Month | | | | | | | | | | | |
