

Neighbourhood Teams

There are 13 Neighbourhood Teams consisting of:

GPs, Nurse Practitioners, Community Nurses,
Occupational Therapists,
Physiotherapists, Social Care Workers,
Pharmacists, Mental Health Nurses,
Health Care Assistants.

Working together, the team will support people to remain in their own home. This may include:

Nursing

Interventions such as wound care, medication management, care of central lines and picc lines, continence management and symptom control and support at end of life and administration of IVs in the community.

Physiotherapy

Mobility analysis, exercise, pain management and long term condition management through education and advice.

Occupational Therapy

Including assessments of daily living activities with recommendations to help patients manage at home. Provision of equipment and minor adaptations.

Adult social care

Helping the patient to plan for the future and use local resources

Carer support

Provide information about services that can help.

- Hospital discharge support and admission prevention providing advanced practitioner assessment, diagnosis treatment and wrap around care support up to 4 times per day. Organisation of short term night sitters
- Support life-limiting conditions and palliative care
- People Living with Long term conditions-Rapid support when unwell to prevent a hospital admission
- Advice and signposting for mental health and wellbeing support
